WHY GARETH?

As a long serving Council Leader and as a London Assembly member I have wide experience of scrutinising not only policy but also the application of policy in delivering strategic goals.

In particular, much of my work on the London Assembly involves scrutinising the activity of third parties, such as Transport For London or the Met Police, a role and function not dissimilar to the role of the council in offering scrutiny to the work of the Federal Board

I believe I have the necessary analytical and critical thinking skills which would add value to the work of the federal council.
