

For a Liberal Renewal!

The Federal Board is the lead body responsible for **party strategy**. It consults and coordinates widely on this and prepares proposals for final agreement at Conference. Unless and until our party wins power or significant influence at a national level, everything else we do rarely leads to change in society. Thus getting **strategy** right is at the heart of our party's future growth and ultimate impact.

Our strategy should be open and flexible, responsive to circumstances. In the last Parliament, we had a single short strategy paper that was largely hidden. In this cycle, we need to do better. In my working life, I have led Europe-wide coordinated and effective campaigns on climate action and clean energy. If elected to the Federal Board, I will bring these skills and experience to our strategy development.

Party standards (complaints, disputes, appeals) have also been a significant issue in recent years. Though there have been some improvements, more work is needed. I hope to build on my experience in this area too.

Strategy and **standards** are my priorities. Please support them and me with your vote. Feel free to email or text me and, if helpful, we can set up a call.
