

Natalie Bird for

Federal Council & ALDE

◆ Giving a voice to the voiceless

We are seeing an increasing attack on the most vulnerable in society, within a cost of living crisis more is pushed onto the poorest and those that can least afford it.

I will provide a voice for the voiceless and ensure the impact of our policies on the most vulnerable is adequately assessed and scrutinised.

◆ Women's rights

Politics is misogynistic and we are seeing misogyny increasing globally. It's more vital than ever that women are able to participate in politics at all levels and are visible within our party and committees

◆ Experience

My experience is in governance, compliance and education. This means I can effectively challenge individuals and the party on issues, this is why my legal case was necessary in the first place.

◆ Committees and diversity of thought

It's key that the committee have an equal balance of male and female as well as diverse viewpoints and perspectives.

It's vital we can challenge each other and scrutinise policy and hold each other accountable.

◆ Strengthening internal governance

Our party is stagnating from within, too many people remaining the same roles for too long and when groupthink develops individuals are unable to challenge each other.

This must change for our party to thrive.
