

VOTE JENNIE RIGG FOR FCC

1

You are going to see a lot of manifestos from a lot of very busy people who have never been on FCC, and have very little idea how much work is involved, promising all sorts of unrealistic things should they get elected.

I've been on FCC for well over a decade. I know I can handle the workload, and I will keep my promises, which are:

- I will run **debates at conference correctly**, with due regard to keeping things to time and following the constitution and standing orders.
- I will select speaker's cards at conference **completely impartially** (I will **never** give preference to "important" people, or any group or person who lobbies me)
- That said, I will **fiercely, fearlessly and loudly** represent the communities to which I belong in FCC meetings:
 - The LGBTQIA+ community
 - Women
 - Disabled people
 - People on lower incomes
 - People not from London
- I will attend **every meeting** unless I am extremely incapacitated (they're all by zoom, so even if hospitalised I should manage it, and I have the attendance record to prove it)
- I will always **answer any question** about conference as honestly as possible
- I will **always be open** about how I have voted (while respecting the confidentiality rules and the privacy of other FCC members)
- I will **complete the necessary work** in a timely fashion (including but not limited to: giving drafting advice; liaising with parliamentarians and their staff; attending and contributing to sub-committee meetings; giving feedback to submitters of motions and amendments; providing training to conference attendees and committee members; etc.)

Basically, I will **do the job** to the best of my ability.

VOTE JENNIE RIGG FOR FCC

1

Things I have advocated for in the past and will continue to advocate for if elected:

- **Better remote participation** at conference to enable as many members as possible to contribute to our party democracy
 - ◆ Remote speaking is hard and expensive with the technologies we currently have, but I will continue to explore and advocate for the use of new and emerging technologies
 - ◆ I will push for fringe bookers, trainers, and exhibitors to improve their remote participation offerings (conference is not just about what happens in the auditorium!)
- The updating and upkeep of the list of **potential venues** (while the reasons we keep going back to the venues we keep going back to are strong ones, new venues emerge all the time, and we must try to keep our offering fresh)
- Innovative ways for members to interact with the party machinery
 - ◆ More Q&As with more than just party spokespeople
 - ◆ New ways of feeding into policy development
- Better **communication** with members about conference and its workings
 - ◆ Better publicising of **childcare options** (the ones we have now are better than a creche! People just need to know about them!)
 - ◆ Better publicising of the **Access Fund** (both for donors and people who need it)
 - ◆ Better publicising of **Newbies events**

Vote for me if you want someone on the committee who will **work tirelessly to make conference the best it can possibly be** for members.
