Vital Champion Defending Freedom in A Dangerous World.

"I know firsthand what it feels like when authoritarian regimes try to silence voices and trample over human rights.

We can never allow ourselves to be complicit. We must always stand tall and push back against repression — especially the growing assertions of the Chinese Communist Party.

That's why my academic work and research on China matter more than ever. They give our Party the edge we need to lead with clarity and courage in the face of such challenging regimes."

Larry is a stellar advocate for **LGBTQ+ rights**, which is more important than ever as far-right leaders attempt a take on our democracy. -
