

John Shreeve

Your First Choice for the
Federal Policy Committee

My Vision

The issues we face as a nation have never been more critical, the threat to our democracy is very real. Indeed, that we simply become a tribute act to Trump's America seems increasingly possible!

We can provide the antidote, the cure, but to do so requires policies that more clearly define us, and so if re-elected to the Federal Policy Committee I will work tirelessly to ensure that from here on it's easier to tell the difference, making sure that in future all our policies are more obviously distinctive, liberal and unafraid.

The issue of economics remains of primary concern. I am extremely grateful for the opportunity to be a member of the Fairer Economy Working Group but that's not enough. By re-electing me to the Federal Policy Committee I will fight to ensure that our policies clearly tell an optimistic, positive liberal story so that no one can be under any illusion as to the values and priorities of this party.
